Please help! My brother and his family are very sick . They had to abandon their home and business every thing that they worked for and own. Because it has been contaminated by a unknown chemical released at the plant at Homa Hills outside of Casper Wyo. This plant has been releasing chemicals in the air and pouring into the drainage ditches for 7 years. All the animals are sick ,live stock that was butchered was found to have green meat. my brothers spring fed pond had 500 dead mud puppies in it over one night ,not even a fly lives in his house. My brother thinks that there was a big leak 3 weeks ago. Every one in the area is sick . The Doctors don't know what they are dealing with. I and my children have been out there as well. My boys have had rashes since. There is a lot more. Please put a stop to this and find out what we are dealing with! You can send info to me at [REDACTED]

[REDACTED] you
in advance for your effort in this matter, [REDACTED]
